Remote Teaching and Social Emotional Learning: Engagement with Technology (3 Credit Course) - EDU-X799R

Learn new and exciting ways to communicate and engage with technology in the remote teaching and learning environment to improve Social Emotional Learning (SEL). Educators will research and discover, in detail, how to effectively and efficiently use and implement the tools learned in the course to engage with students in a remote teaching/learning environment. Educators will learn how to integrate the skills learned to facilitate student engagement and motivation. Educators will apply the knowledge gained in this course to develop lesson plans that can be immediately implemented in their remote classrooms.

Inspiring the Classroom with Motivating Curriculum (3 Credit Course) – EDU-X712P

This course is intended for K-12 educators who would like to develop stimulating and impactful curriculum. Educators will work closely with an instructor in order to promote effective teaching for the current or upcoming school year. Students will use the feedback provided to them by the instructor in order to create goals for the course and ultimately an implementation plan for their new curriculum. Participants have the option to refresh existing lessons and curriculum or they can use this course to build brand new curriculum. Educators have the option to incorporate resources into their plan that will be impactful in the classroom, which may include how to transition to and from the remote learning environment. This course does not limit participants to a specific subject matter; students are free to choose the area of curriculum that they feel would benefit from a redesign. Participants can focus on the need for new resources, textbooks, lesson plans or modify their curriculum in order to align to new standards.

Los Angeles Area Teachers, we listened to you! We have changed the online format to Self-Paced, no more weekly assignment due dates and no more discussion board assignments! Online self-paced courses are a perfect blend of accessibility, convenience and flexibility for you to control your learning pace. Participants will continue to have access to classes, view assignments and course resources at any time from any computer with Internet capability. Your instructor will provide feedback via written responses on your assignments and final project. Grades are based on assignments and completed projects. You have up to December 18, 2020 to complete and submit your course assignments.

Class Dates: September 1 - December 18, 2020

Classes Will Run Concurrently

Registration Closes November 9, 2020
